Fortinet Establishes New European Cloud Data Center

Fortinet's Advanced Security-as-a-Service (SaaS) Portfolio Hosted Locally in the European Union (EU)

SUNNYVALE, CA -- (Marketwired) -- 10/17/16 -- ***Michael Xie, founder, president and chief technology officer at Fortinet***
"Competing in today's digital economy requires businesses of all sizes to be agile, lean and scalable at a global level which is why so many look at cloud-based services. However, concerns about data security and privacy can often be perceived as a barrier to the adoption of such services. Fortinet built our new European cloud data center to eliminate these barriers and enable European business to adopt security solutions delivered from the cloud in the EU and enable their growth. Thousands of customers trust in Fortinet to deliver their security from the cloud everyday."

News Summary
Fortinet® (NASDAQ: FTNT), the global leader in high-performance cybersecurity solutions, today announced the opening of their new FortiCloud European data center based in Germany. Fortinet's new cloud data center enables European customers to leverage the broadest and most mature portfolio of hosted cybersecurity services in the market, with the confidence that their private data remains within European borders.

- Fortinet's European cloud data center address privacy concerns and reduces compliance burdens, enabling enterprises in the EU to adopt cloud-based security solutions and realize the superior protections of the Fortinet Security Fabric.
- The European cloud data center further extends regional support for Fortinet's extensive security solutions with higher performance, scalability, flexibility and simplicity.
- Fortinet is a global leader in Network Security and the #1 security vendor in four countries across Europe, according to IDC's latest security appliance tracker.

Global Security, Local Data Privacy
Defending an organization against today's increasingly sophisticated and exponetially expanding threat landscape requires an integrated, collaborative and adaptive cybersecurity response. Fortinet's Security Fabric vision is changing the way businesses think about their security, delivering an integrated security architecture that scales to cover the entire organization and across attack vectors.

This new data center gives European customers ability to implement the advanced protections of the Fortinet Security Fabric with the flexibility to select the deployment models that best fit business goals. IT teams can realize the operational efficiencies of cloud services and leverage Fortinet's industry leading FortiCloud and FortiSandbox Cloud SaaS offerings with the assurance that their private data never leaves the region.

Availability
Fortinet's FortiCloud and FortiSandbox Cloud solutions hosted in the European data center are available now.

Additional Resources

- FortiCloud analytics, log retention and provisioning services unify deployment, configuration and visibility across FortiGate, FortiWIFI and FortiAP security devices to protect organizations from IoT to the Cloud, with the Fortinet Security Fabric.
- FortiGuard FortiSandbox Cloud Service offers proactive detection and mitigation of today's most advanced, persistent and targeted attacks using real-time threat intelligence that proactively adapts defenses across the Security Fabric.
