#### **Forward-looking Statements**

This press release contains forward-looking statements that involve risks and uncertainties. These forward-looking statements include statements regarding market adoption of cybersecurity and expectations regarding positioning for market share gains and growth potential. Although we attempt to be accurate in making forward-looking statements, it is possible that future circumstances might differ from the assumptions on which such statements are based. Important factors that could cause results to differ materially from the statements herein include the following: general economic risks; global economic conditions and foreign currency risks; increasing competitiveness in the security market; the dynamic nature of the security market; specific economic risks worldwide and in different geographies, and among different customer segments; uncertainty regarding increased business and renewals from existing customers; uncertainties around continued success in sales growth and market share gains; longer sales cycles, particularly for larger enterprise customers; failure to convert sales pipeline into final sales; risks associated with successful implementation of multiple integrated software products and other product functionality risks; execution risks around new product development and introductions, and innovation and market acceptance of new products; litigation and disputes and the potential cost, distraction and damage to sales and reputation caused thereby; market acceptance of new products and services; the ability to attract and retain personnel; changes in strategy; risks associated with management of growth; lengthy sales and implementation cycles, particularly in larger organizations; technological changes that make our products and services less competitive: risks associated with the adoption of, and demand for, our products and services in general and by specific customer segments; competition and pricing pressure; risks related to integrating acquisitions; and the other risk factors set forth from time to time in our most recent Annual Report on Form 10-K, our most

recent Quarterly Report on Form 10-Q and our other filings with the SEC, copies of which are available free of charge at the SEC's website at <u>www.sec.gov</u> or upon request from our investor relations department. All forward-looking statements herein reflect our opinions only as of the date of this release, and we undertake no obligation, and expressly disclaim any obligation, to update forward-looking statements herein in light of new information or future events.

#### **Non-GAAP Financial Measures**

We have provided in this release financial information that has not been prepared in accordance with Generally Accepted Accounting Principles (GAAP). These non-GAAP financial measures are not based on any standardized methodology prescribed by GAAP and are not necessarily comparable to similar measures presented by other companies. We use these non-GAAP financial measures internally in analyzing our financial results and believe they are useful to investors, as a supplement to GAAP measures, in evaluating our ongoing operational performance. We believe that the use of these non-GAAP financial measures provides an additional tool for investors to use in evaluating ongoing operating results and trends and in comparing our financial results with peer companies, many of which present similar non-GAAP financial measures to investors.

Non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. Investors are encouraged to review the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures provided in the financial statement tables below.

*Billings.* We define billings as revenue recognized in accordance with GAAP plus the change in deferred revenue from the beginning to the end of the period less any deferred revenue balances acquired from business combination(s) during the period. We consider billings to be a useful metric for management and investors because billings drives future revenue, which is an important indicator of the health and viability of our business. There are a number of limitations related to the use of billings instead of GAAP revenue. First, billings include amounts that have not yet been recognized as revenue. Second, we may calculate billings in a manner that is different from peer companies that report similar financial measures. Management accounts for these limitations by providing specific information regarding GAAP revenue and evaluating billings together with GAAP revenue.

*Free cash flow.* We define free cash flow as net cash provided by operating activities minus capital expenditures such as purchases of property and equipment. We consider free cash flow to be a liquidity measure that provides useful information to management and investors about the amount of cash generated by the business that, after the acquisition of property and equipment, can be used for strategic opportunities, including investing in our business, making strategic acquisitions, repurchasing outstanding common stock, and strengthening the balance sheet. Analysis of free cash flow facilitates management's comparison of our operating results to those of our peer companies. A limitation of using free cash flow does not represent the total increase or decrease in the cash, cash equivalents and investments balance for the period because it excludes cash provided by or used for other investing and financing activities on the face of the cash flow statement and under the capital expenditures and other investing and financing activities on the face of the cash flow statement and under the capital expenditures in and financing activities on the face of the cash flow statement and under the capital expenditures and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources'' in our most recent Quarterly Report on Form 10-Q and Annual Report on Form 10-K.

*Non-GAAP operating income and operating margin.* We define non-GAAP operating income as operating income or loss plus stock-based compensation, business acquisition-related charges, including inventory fair value adjustment amortization and other purchase accounting adjustments, impairment and amortization of acquired intangible assets, restructuring charges, expenses associated with the implementation of a new Enterprise Resource Planning (ERP) system, and, when applicable, any other significant non-recurring items in a given quarter. Non-GAAP operating margin is defined as non-GAAP operating income divided by GAAP revenue. We consider these non-GAAP financial measures to be useful metrics for management and investors because they exclude the items noted above so that our management and investors can compare our recurring core business operating results over multiple periods. There are a number of limitations related to the use of non-GAAP operating income instead of operating income or loss calculated in accordance with GAAP. First, non-GAAP operating income excludes the items noted above. Stock-based compensation has been and will continue to be, for the foreseeable future, a significant recurring expense in our business. Second, stock-based compensation is an important part of our employees' compensation and may impact their performance. Third, the components of the costs that we exclude from our calculation of non-GAAP operating income may differ from the components that peer companies exclude when they report their non-GAAP results of operations. Management accounts for these limitations by providing specific information regarding the GAAP amounts excluded from non-GAAP operating income and evaluating non-GAAP operating income together with operating income or loss calculated in accordance with GAAP.

Non-GAAP net income and diluted net income per share. We define non-GAAP net income as net income plus the items noted above under non-GAAP operating income and operating margin, adjusted for the impact of the tax adjustment, if any required, resulting in an effective tax rate on a non-GAAP basis, which often differs from the GAAP effective tax rate. We define non-GAAP diluted net income per share as non-GAAP net income divided by the non-GAAP diluted weighted-average shares outstanding. We consider these non-GAAP financial measures to be useful metrics for management and investors for the same reasons that we use non-GAAP operating income and non-GAAP operating margin. However, in order to provide a complete picture of our recurring core business operating results, we include in non-GAAP net income and non-GAAP diluted net income per share, the tax adjustment required resulting in an effective tax rate on a non-GAAP basis, which often differs from the GAAP tax rate. We believe the effective tax rates we used are reasonable estimates of normalized tax rates for our current and prior fiscal years under our global operating margin apply to our use of non-GAAP net income and non-GAAP diluted net income per share. We account for these limitations by providing specific information regarding the GAAP amounts excluded from non-GAAP net income and non-GAAP net income per share together with net income per share and evaluating non-GAAP net income and non-GAAP diluted net income per share together with net income per share and evaluating non-GAAP net income and non-GAAP.

In March 2016, the Financial Accounting Standards Board issued Accounting Standard Update ("ASU") No. 2016-09, which allows a company to make a policy election to account for forfeitures as they occur. We early adopted this standard and elected to account for forfeitures as they occur using the modified retrospective transition method. The adoption of this standard resulted in a decrease of \$2.0 million in our share-based compensation during the first quarter of 2016. The adjustment was reflected in the six-months ended June 30, 2016 condensed consolidated statement of operations.

<sup>2</sup> The adoption of ASU 2016-09 resulted in a decrease of \$3.6 million in our provision for income taxes during the first quarter of 2016. The adjustment was reflected in the six-months ended June 30, 2016 condensed consolidated statement of operations.

#### Reconciliation of diluted weighted average shares outstanding used in the calculation of GAAP and non-GAAP earnings per share

		Three Mor	ths Ended
		June 30, 2016	June 30, 2015
Shares used in diluted net loss per share calculations - GAAP		172,075	176,234
Adjustment for diluted weighted average shares outstanding	(a)	4,223	—
Shares used in diluted net income per share calculations - Non-GAAP		176,298	176,234

(a) GAAP diluted weighted average shares outstanding differs from non-GAAP diluted weighted average shares outstanding in periods when we have a GAAP net loss and a non-GAAP net income. The adjustment for diluted weighted average shares outstanding represents the dilutive effect of employee equity incentive plan awards and is calculated by applying the treasury stock method.
