## Fortinet(R)'s FortiMail Wins SC Magazine 5 Star Award and Recommended Rating

### High Performance and Feature Rich Email Security Appliance "An Excellent Value"

SUNNYVALE, CA -- (Marketwired) -- 09/12/13 -- [Fortinet®](#) (NASDAQ: FTNT) -- a world leader in [high-performance network security](#) -- today announced the company's [FortiMail-200D](#) was [honored by SC Magazine](#) with a five star (out of five stars) award and "Recommended" rating in the magazine's latest email appliance roundup published on September 3, 2013. The appliance won perfect five star marks in the categories of Features, Ease of Use, Performance, Support and Value for Money. For the [full review](#), please visit: <http://www.scmagazine.com/fortinet-fortimail-200d/review/3997/>

In a head-to-head comparison against eight email security appliances from competitors such as Cisco, McAfee, Barracuda Symantec, and WatchGuard, SC Magazine reviewer, Peter Stephenson wrote, "... we found this solution to be an excellent value for the money. While it may be designed for smaller branch office environments, it has the features and functionality of a large enterprise-class mail security appliance." In addition, he found the interface "... to be well-organized with a clean layout and intuitive controls."

#### **About the FortiMail-200D**

The FortiMail-200D delivers highly effective bi-directional antispam and antimalware capability to shield organizations and end users from unwanted and malicious messages. In June this year, FortiMail earned a [Virus Bulletin VBSpam+ Certification](#) based on high spam catch rate and zero false positives. This was FortiMail's 24th consecutive Virus Bulletin award.

It also offers integrated data leak prevention (DLP) and identity-based encryption with, as Stephenson notes in his review, "... email security and data leakage policy templates onboard and ready to go right out of the box."

Email archiving rounds out a robust feature set which, like other products in the FortiMail family, is available via a flat device-based licensing that ensures organizations can grow their secure messaging deployments without incurring costly user-based licensing fees.

"It's really gratifying to put so much hard work and resources into a product and see it get validated by well-respected publications such as SC Magazine and Virus Bulletin," said John Maddison, vice president of marketing for Fortinet. "With many traditional email security providers faltering, we see a meaningful opportunity and intend to continue to innovate on our email security appliance platform."

#### **About Fortinet ([www.fortinet.com](http://www.fortinet.com))**

Fortinet (NASDAQ: FTNT) is a worldwide provider of network security appliances and a market leader in unified threat management (UTM). Our products and subscription services provide broad, integrated and high-performance protection against dynamic security threats while simplifying the IT security infrastructure. Our customers include enterprises, service providers and government entities worldwide, including the majority of the 2012 Fortune Global 100. Fortinet's flagship FortiGate product delivers ASIC-accelerated performance and integrates multiple layers of security designed to help protect against application and network threats. Fortinet's broad product line goes beyond UTM to help secure the extended enterprise -- from endpoints, to the perimeter and the core, including databases and applications. Fortinet is headquartered in Sunnyvale, Calif., with offices around the world.
